

**Greek Row Life Safety Upgrades
Phase II – Summer 2006
Vanderbilt University
Nashville, Tennessee**

Owner's Representative:

Mr. David Felts, AIA
Vanderbilt University
Campus Planning & Construction
Nashville, Tennessee

Architect:

Fowlkes and Associates Architects, Inc.
Nashville, Tennessee

Construction Duration:

15 weeks

Contract Amount:

\$625,300

Project Description:

Wieck Construction managed the second phase of Vanderbilt University's Life Safety & Fire Protection upgrades during the summer months of 2006. Phase II concentrated on fire sprinkler and life safety upgrades in seven sorority houses. Through our Phase I experience, we again chose to write contracts with multiple sprinkler companies to insure the strict timetable was achieved. Again, each fire sprinkler subcontractor was responsible for individual sorority houses.
