

**Owen Graduate School of Management  
Vanderbilt University  
Nashville, Tennessee**

Owner's Representative:

Mrs. Sybil L'heureux  
Owen Graduate School of Management  
Vanderbilt University  
Nashville, Tennessee

Architect:

Everton Oglesby Architects  
Nashville, Tennessee

Project Descriptions:

Wieck Construction has continued to build on a relationship with Owen Graduate School of Management that began several years ago at a previous construction company. Over the years the people at Wieck have constructed a variety of projects. Each of these projects involved close coordination with the Owen School and Campus Planning to minimize the disruption to the school. Planning, scheduling and pre-ordering materials proved to be critical tools necessary to accomplish these goals. Some of the projects were:

- **Third Floor Addition**  
Constructed a single story office space addition over the existing Dean's administration offices located on the second floor. The project also included the complete renovation of the student lounge and locker area as well as the computer lab.
- **Admissions and Placement Renovation**  
Renovated the existing offices to combine both departments in one connecting area.
- **Fire Alarm and Smoke Evacuation System Installation in Lobby**  
Installed a fire alarm system in the main lobby of the building that was directly connected to the campus security system. Created a smoke evacuation system for the two story lobby and replaced all exterior doors with egress doors tied into the fire alarm system.
- **Classroom 218 Renovation**  
Upgrade classroom to a multi communication room with stadium type seating.
- **Classroom 220 Renovation**  
Upgrade classroom to a multi communication room with stadium type seating. Provided a student lounge area for the executive department adjoining the classroom.
- **Classroom 110 Renovation**  
Renovated the existing auditorium into a multimedia classroom. This included removing the existing 8" concrete floor to accommodate the new seating layout while business proceeded in the Dean's office above.

Our success with Owen Graduate School of Management can be summarized in two quotes by Ms. Sybil L'heureux:

*"I was impressed that they seemed to care as much about the quality of their work as I did."*

"You can consider this a recommendation for Wieck Construction to be added to your list of reliable, dependable construction companies for bids in the future. As for myself, I would be happy to work with them again."
